

HERD SIRE: OSSAWA VALLEY 29E

OSSAWA VALLEY 29E

1960614

December 02, 2017

We purchased this SAV Angus Valley grandson to use on our commercial cow herd. He has given us 2 calf crops without any issues. He is very sound at foot and has proven to be a very efficient breeder. We used him on a few registered cows in 2021

and he has a few calves in the dispersal. He has the look of a herd sire; however, his Calving EPD's are really extreme. He gave us 8 pure bred calves this year with average BW of 87. He has sired over 50 commercial cows and we never had any problems. I feel he can add value to a commercial herd. [Angus Valley 29E](#) sells April 22 as part of the Black Creek Dispersal
